

# Fungus Weevil Recorded at Moorehall in August 2017

On 29th August 2017, Michael Kingdon of Moorehall, recorded one specimen of the fungus weevil (*Platystomos Albinus*) – see photo below.

Michael has submitted this record to the National Biodiversity Centre and is awaiting verification.

This is a very unusual sighting. According to the website [coleoptera.org.uk](http://coleoptera.org.uk) *Platystomos Albinus* was recorded as “new to Ireland” in 2012.
